ADMIN PORTAL

**ADMIN PORTAL DESCRIPTION:**

       It deals with all the back-end data generation and product information. The role of the admin is to:

- Authorize the user
- Grant access to user
- Enable/disable the user
- Authorize the Cheque Book requests

User Authorization:

       After successful registration on the user portal, the user waits for the confirmation mail from the admin for his/her registration. The admin verifies the data given by the user and upon verification, the status is sent to user's email which is provided by the user at the time of registration. Only upon successful verification, the user's account will get activated, the account number gets generated and he/she can proceed with banking activities. In case of failure, user has to re-register by providing the correct data. The admin also has a login to view the user details and perform actions accordingly.
